*Happy
American
Pharmacists
Month!*

Every October, Mirixa celebrates each of you for American Pharmacists Month.

October is American Pharmacists Month – a time to recognize all pharmacists and pharmacy staff. We appreciate and celebrate your tireless efforts to improve your patients' health. Because of each of you, your patients have a better understanding of their medications, they are setting and achieving health goals, and they're preventing illness with immunizations and improved adherence to their chronic medications.

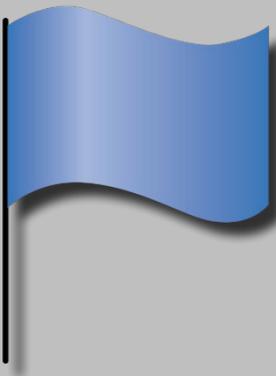

From Mirixa, a big thank you for your dedication each and every day!

Begin With The End in Mind: Generating Documents

CMS requires a **patient handout—cover letter, medication action plan (MAP), and personal medication list (PML)**—be delivered to a patient within 14 days of conducting a comprehensive medication review (CMR). If needed, you can use a **physician summary letter (PSL)** to summarize the CMR and communicate your recommendations to the patient's prescriber(s). In targeted programs, although not required, you can use those same patient handout documents and the PSL to help reinforce good health practices and to communicate any recommendations.

At any point in the case you may generate and preview these documents by accessing "Documents" in the top right-hand corner of a case.

Best Practice Tip: Care Gap Alerts

To provide the most comprehensive MTM service, Mirixa has developed clinical rules to identify potential gaps in care for adherence and/or omissions. Check out the attached Best Practice tip to understand how Care Gap Alerts can help you provide a better service.

Best Practices: Omission and Adherence Care Gap Alerts

Mark Your Calendars: Drug Take Back Day is October 27th!

The DEA reminds us that unused or expired prescription medications are a public safety issue, leading to potential accidental poisoning, misuse, and overdose. Proper disposal of unused drugs saves lives and protects the environment.

Visit <https://takebackday.dea.gov/> for more information and additional resources.

To find year-round authorized prescription drug collection sites in your area, visit <https://apps.deadiversion.usdoj.gov/pubdispsearch> and enter your zip code.

Thanks for Asking!

Answers to your questions about the MirixaProSM platform - process, programs, and more!

Jeremy Lee, Pharmacy
Network Support Associate

Q.

I'm interested in finding out how I can check on my pharmacy's performance. Are there reports available that can show how we are doing? And, if so, how do I access those reports?

A.

There are several ways to check on your pharmacy's performance. First, the MirixaPro platform includes a Pharmacy Dashboard on the home page of MirixaPro. The Dashboard provides an up-to-date snapshot view of your pharmacy's Mirixa case activity each time you log on. The dashboard shows year-to-date performance, as well as current year versus last year, so you can always be aware of how well your pharmacy is progressing in providing services to your patients through MirixaPro.

Additionally, the MirixaPro platform contains many reports on your pharmacy's performance. These reports are easy to run and can be accessed at your convenience through the platform. Simply go to the "Admin Tools" area of the MirixaPro platform in order to download reports on activities such as billing, case history, case due dates, and pharmacy user information.
