# OVERCOMING PATIENT OBJECTIONS

**Time-Tested Responses  
To Get Patients  
to Say "Yes" to MTM!**

Sometimes it can be difficult to get a patient to agree to a CMR service.

Click [HERE](#) for suggested responses that may help overcome common patient MTM objections and turn a hesitation into a "Yes"!

## May Someone Else Complete My Mirixa MTM Cases?

Mirixa firmly believes that community pharmacists conducting medication management services with their patients, either face-to-face or telephonically, is the best expression of the relationship between a pharmacist and their patient. And, as a community pharmacist, you know your patients; you have access to their dispensing information; and they have entrusted you with their pharmacy needs.

If your pharmacy needs additional staffing to help complete your MirixaPro cases, Mirixa does support consultant pharmacists in some situations. Click [HERE](#) for further details.

## DOCUMENTING A 30-TO-90-DAY CONVERSION CASE

The primary objective of these cases is to convert a patient from a 30-day medication supply to a 90-day medication supply to help improve patient adherence to chronic medications.

Read [HERE](#) for details and reminders about working and documenting your 30-to-90-Day Conversion Cases!
